PROFESSIONAL SUMMARY

Full-Stack Software Developer with over 6 years of professional experience specializing in PHP and Laravel backend development. Experienced in building and maintaining production systems involving REST APIs, relational databases, payment processing, asynchronous workflows, third-party integrations, authentication, authorization, and real-time functionality. Strong experience with Laravel, PHP, MySQL, PostgreSQL, Redis, queues, Laravel Horizon, Docker, Linux, Nginx, AWS S3, and REST APIs.

CORE TECHNICAL SKILLS

Backend & API Engineering

PHP Laravel REST APIs OOP Eloquent ORM MVC Middleware Authentication Authorization Validation
Events & Jobs Webhooks

Databases, Architecture & Asynchronous Processing

MySQL PostgreSQL Redis Database Design Clean Architecture SOLID Laravel Queues Laravel Horizon
Scheduled Jobs

Payments, DevOps & Frontend

Paystack & Idempotency Docker Linux/Ubuntu Nginx AWS S3 PM2 Vue.js Nuxt TypeScript Pinia
Tailwind CSS WebSockets

PROFESSIONAL EXPERIENCE

Software Developer

April 2021 – Present | Ghana

AgroCenta

- Design, develop, and maintain production applications and backend services using PHP, Laravel, RESTful APIs, and third-party integrations.
- Work extensively with MySQL and PostgreSQL for database relationships, transactional workflows, queries, and asynchronous Redis/Horizon processing.
- Implement payment workflows using Paystack (transaction initiation, verification, webhooks, withdrawals) alongside robust idempotency mechanisms.
- Investigate and resolve production issues across application code, APIs, databases, Redis, queues, storage, and infrastructure.
- Configure and maintain Docker, Linux/Ubuntu, Nginx, Redis, PM2, and deployment environments alongside Vue.js/Nuxt frontend features.

Full-Stack Software Developer / Backend Specialist

Pebble — Pebbles Inc.

- Helped build and maintain Pebble, a production streaming platform for 10,000+ subscribers using Laravel APIs, Sanctum, Spatie Permission, and Nuxt frontend.
- Redesigned file uploads using AWS signed URLs for direct-to-S3 client transfers, eliminating API file-transfer bottlenecks, reducing server bandwidth, and supporting chunked >100MB uploads with Pinia state.
- Integrated Paystack for payment processing and webhooks, implementing withdrawal idempotency to prevent duplicate transactions.
- Built asynchronous workflows using Redis, Queues, and Horizon for content discovery, scheduled background jobs, adaptive streaming, and real-time WebSockets.

Technical Lead / Full-Stack Developer

Traceable

- Led a team of five developers in designing and delivering Traceable for five SMEs under a USAID-sponsored initiative, providing technical direction and hands-on coding.
- Participated in architecture, database design, debugging, integration, and technical decision-making, translating business requirements into robust solutions.

Full-Stack / Backend Developer

Kuzima

- Developed Laravel backend functionality supporting USSD-driven application workflows, external API integrations, database workflows, and asynchronous processing.

Programming Assistant

September 2019 – April 2021 | Ghana

Weija-Gbawe Municipal Assembly

- Developed and maintained web applications using PHP and Laravel based on organizational requirements, assisting with debugging and maintenance.

SELECTED PROJECTS

Pebble: PHP · Laravel 13 · MySQL/PostgreSQL · Redis · Laravel Horizon · Paystack · AWS S3 · Vue.js · Nuxt · TypeScript · WebSockets. Production streaming platform for 10,000+ subscribers featuring authentication, content management, payments, creator earnings/withdrawals, asynchronous processing, direct S3 signed uploads, chunked transfer, and adaptive streaming.

Traceable: PHP · Laravel · Full-Stack Development · Technical Leadership. USAID-sponsored agricultural digital traceability platform built for 5 SMEs. Led a 5-person development team across architecture, implementation, and delivery.

Kuzima: PHP · Laravel · USSD · APIs. USSD-focused application involving Laravel backend development, external API integrations, database workflows, and asynchronous processing.

EDUCATION

Pentecost University — Bachelor of Science (BSc) in Information Technology

Second Class Honors | Graduated: 2019
